

Considerations during Family Information Gathering:

1. Dig deeper into information about routines and satisfaction with routines, aligning to child interest and parent responsiveness during the routine.

Examples:

- Tell me more about (specific routine). What are you doing? What is your child doing?
- How well do you think this routine is going?
- What does the ideal situation look like?
- What are your thoughts about how you would like your child to participate in this routine?

2. Dig deeper into the specific concern area and which routines are worrisome for the family.

Examples:

- What are you concerned/worried about right now?
- Which routines are a priority for your family?
- When do you see those concerns during routines?
